**Proj:**  
**ID:**  
**Date:** May , 2008  
**Subj:** SHoP Construction  
Summer Internship in Digital Integration & Construction Management

SHoP Construction Services LLC, a digital integration and construction management company in New York City, is looking for select candidates for its summer internship program. All applicants should have some exposure to Building Information Modeling (BIM,) but most importantly need to have a sincere interest in redefining the tools and methods that architects, engineers, construction managers and builders use to make a building. Over the course of this summer, interns will have an opportunity to work with Revit, IES, MS Project, Tekla, NavisWorks, Solibri, among other programs to inform both the preconstruction and construction phases of a few landmark projects across the United States. These projects include a new LEED Platinum building on Google's campus in California, a developer-oriented office complex along the High Line in New York City, and an institutional project for a new lab building at the Fashion Institute of Technology. All applicants will have exposure to issues concerning constructability, schedule, cost, sustainability and logistics. Communication skills are of particular importance as all interns will be working in small teams on real projects and at times, directly with the firm's principals.

All qualified applicants should submit their credentials to:

Jonathan L Mallie RA  
Principal/ Managing Director  
SHoP Construction Services LLC  
11 Park Place Penthouse  
New York, NY 10007  
(t) 212 889 9005 x 116

SHoP Construction will make its selection of interns by the end of May 2008.
